UCLA Research Opportunity

Obsessive Compulsive Disorder

YOU CAN HELP!!!

We are investigating genetic factors that may increase the risk to OCD. We are seeking help from individuals with OCD (adults and children 8 yrs old and up) and their parents to help conduct this study.

This study will involve 1 visit that includes:
1. Confidential interview about your medical and psychiatric history
2. Provide a small sample of blood

You & your parents will be paid up to $140 total for your time
