UCLA Research Study

Healthy Volunteers Needed

This is not a treatment study

We are conducting a research study examining sleep in healthy individuals.

The study involves:

➢ Physical evaluation and interview
➢ Four overnight sleep assessments with EEG sensors & blood draws
➢ Partial sleep deprivation on one night
➢ Compensation of up to $425
➢ Risk include possible skin irritation from EEG sensors & possible pain from blood draws

Please call 310-825-8425 for more information

Study conducted by
Sarosh Motivala, Ph.D., Daniel Furst, M.D. & Michael Irwin, M.D.
