ChatterBaby: Speech Recognition of Infants to Identify Distress and Developmental Delays

Ariana Anderson, Ph.D.
Assistant Research Statistician
Semel Institute at UCLA

LEARNING OBJECTIVES:
1. Demonstrate the ChatterBaby algorithm for infant speech recognition to predict whether and why a baby is crying.
2. Demonstrate how MHealth smart-phone apps may be usable for large-scale data collection of developmental and vocal history.
3. Assess implications of speech recognition algorithms for predictive analytics in other disorders, including stroke and schizophrenia.

WEDNESDAY
January 11th, 2017
12:30 – 1:30 PM

Location: UCLA
300 Medical Plaza, Suite 3200
3rd Floor Marisa Leif Conference Room
Los Angeles, CA 90095
