Does your child have frequent worries or fears?
Is your child between the ages of 6 and 9?

If you answered yes, you and your child may be eligible to participate in a UCLA research study about how anxious children pay attention to and cope with emotions!

What does the study involve?

Two lab visits (total of ~3 hours) where:
• Your child’s brain waves will be recorded while playing computer games
• You complete interviews and questionnaires

Short phone interviews over 2 weekends that include:
• Questions about your child’s emotions and activities
• Short (45s) audio recordings of your child’s emotional reactions

Two follow-up interviews where:
• You will complete a few questionnaires about your child’s anxiety symptoms

Compensation will be provided.

If interested, call 310-825-3251 or email childemotion.UCLA@gmail.com for more information!

What are the risks & benefits of participating?

• Information from this study could help improve the diagnosis & treatment of pediatric anxiety disorders.
• Evaluation and, when indicated, treatment referral options for child anxiety will be provided.
• There are no medical risks associated with this study.
• You and your child will be compensated for your time.
