Was your child exposed to alcohol during pregnancy?

Investigators:
Jennifer Levitt, MD
Mary O’Connor, PhD

- Is your child considered very active?
- Does your child have a difficult time paying attention?
- Have your child’s teachers suggested that your child may have ADHD?

If you answered YES to any of these questions and your child is between the ages of 8 and 13, we would like to invite him/her to participate in a study at UCLA.

This study involves:
- One MRI brain scan. MRI is safe and does not use radiation.
- Cognitive assessments + diagnostic interviews

$100 compensation is provided for time + travel to participate in this study.
