

# HOW DOES AUTISM DIFFER IN GIRLS AND BOYS?

We are seeking individuals with autism between the ages of 7-35 for a study to better understand gender differences in autism

This study is funded by the National Institutes of Health's network of Autism Centers of Excellence (ACE)

Participants may be asked to complete one or more of the following:

MRI/fMRI scans, EEG, blood draw, saliva collection, questionnaires, and/or behavioral assessments over 2-3 visits.

All study related assessments are free of charge  
Compensation up to **\$440** for participants
