

HOW TO GET INVOLVED WITH THE AUTISM GENETICS & HUMAN DIVERSITY PROJECT

The purpose of the Autism Genetics and Human Diversity Project is to help researchers understand genetic risk for autism spectrum disorders as well as healthcare disparities in autism services among African American families.

FOR INQUIRIES, EMAIL US AT AUTISMGENTICS@UCLA.EDU OR CALL US AT (310) 794 - 4090

Families of African American descent with Children age 3 or older with suspected or diagnosed autism spectrum disorder (ASD) are encouraged to participate.

Participation Involves:

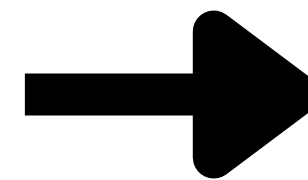

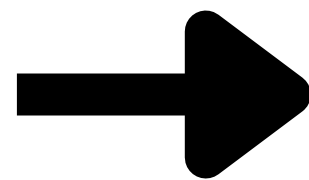

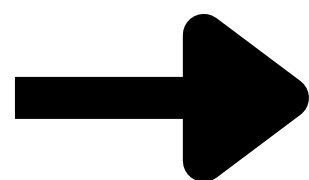

- 1 One screening phone call
- 2 Visits via tele-health and in-person
- 3 Observations of your children's behavior
- 4 Questionnaires and interviews for parents about yourselves and your children's development

Families completing the study will receive \$250 and a feedback report.
