

UCLA Study for Individuals taking Risperidone or Aripiprazole

The purpose of this 26-month (2 per year to visits to UCLA and monthly contacts) study is to examine long-term effects on weight, while taking Risperidone or Aripiprazole.

You are eligible to participate if you:

- Are between 3-17 years old
- Currently taking Risperidone or Aripiprazole
- Parent or designated support person available

Study Procedures:

- In-person visits include questionnaires about overall health, physical exams, vital signs, and blood draws.
- Brief monthly contacts for medication and health status updates
- Reimbursement up to \$250 (\$50 per completed scheduled clinic visit)

**For more information, contact UCLA at
310 825-6170 or jcowen@mednet.ucla.edu**
