

UCLA HIV/AIDS, Substance Abuse, and Trauma Training Program (HA-STTP)

The UCLA HIV/AIDS, Substance Abuse and Trauma Training Program (HA-STTP) is a collaboration of the Center for Culture, Trauma and Mental Health Disparities (CCTMHD), the UCLA AIDS Institute, the Center for HIV Identification, Prevention and Treatment Services (CHIPTS), and the Nathanson Family Resilience Center (NFRC).

The goal of HA-STTP is to provide multi-disciplinary, state-of-the-art research training in HIV/AIDS, substance abuse, traumatic stress, and health disparities to postdoctoral scholars including postdoctoral fellows, and early career clinical researchers and faculty. Under the guidance of HA-STTP faculty and mentors, trainees will acquire a broad range of skills necessary to establish career independence, including NIH grant preparation.

This five-year program selects scholars to train at UCLA twice per year. Personalized career and research mentoring, training, and pilot funding are provided.

Potential candidates must have the following:

1. A doctoral degree or medical residency within the past 7 years;
2. Experience with HIV, substance abuse, trauma, health disparities, racial/ethnic discrimination, structural racism, and/or bio- and socio-behavioral research;
3. Ability and commitment to attend two week-long training institutes per year (travel and housing are covered); and
4. Clear articulation of research goals and training needs.

Applicants from historically black colleges and universities and other minority- serving institutions are strongly encouraged to apply.

Applications are due September 3rd, 2021

Please contact the program Co-Directors, Gail E. Wyatt, Ph.D. at gwyatt@mednet.ucla.edu or Norweeta G. Milburn, Ph.D. at nmilburn@mednet.ucla.edu with any questions. The application is available from Amber Smith at Ambersmith@mednet.ucla.edu.
