

Tarjan Center Lecture Series presents:

## Biological Treatments for Autism Spectrum Disorder and Co-Occurring Conditions: The Commonly Used, The Commonly Tried, and What's Next

### Benjamin Schneider, MD

Assistant Clinical Professor  
Psychiatry and Biobehavioral Sciences  
Associate Director, Child and Adult Neurodevelopment (CAN) Clinic  
Medical Director, UCLA ABC Partial Hospitalization Program

#### LEARNING OBJECTIVES:

1. Learners should gain familiarity with commonly prescribed medications in the treatment of autism spectrum disorder
2. Learners should gain understanding of potential additional benefits to psychotropic medication prescribing.
3. Discuss pertinent complimentary and alternative treatments and the research pipeline.
