

WAS YOUR CHILD EXPOSED TO ALCOHOL DURING PREGNANCY?

UCLA Semel Institute for
Neuroscience and Human Behavior

Investigators:
Jennifer Levitt, MD
Mary O'Connor, PhD

- *Is your child considered very active?*
- *Does your child have a difficult time paying attention?*
- *Have your child's teachers suggested that your child may have ADHD?*

If you answered YES to any of these questions and your child is between the ages of 8 and 13, we would like to invite him/her to participate in a study at UCLA.

This study involves:

- One MRI brain scan. MRI is safe and does not use radiation.
- Cognitive assessments + diagnostic interviews

\$100 compensation is provided for time + travel to participate in this study
