Help Us Understand How the Brain Makes Decisions!

UCLA and Caltech are working together on a research study to learn how the brain makes decisions in people with depression, anxiety, significant appearance concerns, and obsessions/compulsions. We hope this will lead to improved treatments for patients.

You may be able to participate if you:

• are 18-65 years old
• have any of the mental conditions listed above
• are fully vaccinated against COVID-19

If you decide to participate, you will:

• Complete online activities, and
• Have an MRI scan of your brain at Caltech (Pasadena, CA)

Time Commitment: 5.5hr (2.5hr online, 3hr in-person)

Compensation: $20-$30/hr + performance-based bonus and $50 completion bonus

IRB Protocol #: 19-0914
Principal Investigator: John O’Doherty
