Measuring Mental Health and Related Factors in Autism: State of the Science, Implications, and Future Directions

Hillary K. Schiltz, M.S.

Clinical Psychology Intern
Autism and Neurodevelopmental Disabilities Assessment Track, UCLA
PhD Candidate in Clinical Psychology, Marquette University

Monday April 18, 2022
11:30AM – 12:30PM, PST
(via Zoom)

Learning Objectives:
1. Describe at least one reason why accurate measurement of mental health and related factors is important for research and clinical work with autistic people.
2. Identify and define qualities of a "good" questionnaire.
3. Describe at least one way researchers and clinicians can work to improve measurement among autistic people.

All are welcome! Registration is required.
