

Tarjan Center Lecture Series presents:

Building A Co-Occurring Care Model for Children and Youth with Autism Spectrum Disorder

J. Thomas Megerian, MD, PhD

Clinical Director of Thompson Autism Center
Division Chief, Neurodevelopmental Medicine at CHOC

Monday March 21, 2022
11:30AM – 12:30PM, PST
(via Zoom)

Learning Objectives:

1. Understand the unmet needs of children, adolescents, and young adults with ASD under current care models.
2. Identify the benefits to collaborative models of care for this population.
3. Understand the success and challenges to delivering this model of care.

All are welcome! Registration is required.
