EDUCATION

Johns Hopkins Bloomberg School of Public Health Baltimore, MD
Doctor of Philosophy in Infectious Disease Epidemiology 2008
Thesis: "Sexual Violence and HIV Risk Among U.S. Women:
Results from the National Survey of Family Growth, 2002"

The George Washington School of Public Health and Health Services Washington, DC
Master of Public Health in Epidemiology/Biostatistics 2002
Thesis: "An Internet Surveillance Investigation of Chat Rooms and Websites
Used by Individuals Seeking Sex Partners in the Washington, DC Metro area:
A Necessity for the Guidance and Planning of STD Prevention Efforts"

Holy Names University Oakland, CA
Bachelor of Science in Biological Science 1999
Minor in Chemistry
Regents' Scholar

PROFESSIONAL EXPERIENCE

Postdoctoral Fellow Baltimore, MD
Johns Hopkins University 2008 – present
School of Nursing

- Serve as Co-Investigator on a research study addressing abuse and health consequences among African American women and Afro Caribbean women
- Develop research study questionnaire targeted towards female cases with a history of intimate partner violence and controls with no history of intimate partner violence, both groups recruited at public health clinics in Baltimore, MD and the U.S. Virgin Islands.
- Develop the interviewer and safety protocol manuals for data collection activities which include recruitment procedures, informed consent process, script for interviewers for survey administration, mandatory reporting guidelines (e.g. reportable communicable diseases, child abuse), and procedures to handle and report adverse events.
- Serve as data manager for the maintenance and management of quantitative data.
- Contribute significantly to manuscript preparation for peer-reviewed journals.
- Prepare and present scientific findings at seminars and conferences.
- Supervise 4 graduate students in duties related to data collection and data analysis.
- Approval authority for revision of questionnaire items on survey instruments.

Research Assistant

Baltimore, MD

**Johns Hopkins Bloomberg School of Public Health
Center for Injury Research and Policy**

4/07 – 8/08

Effects of Formal Danger Assessment on Actions to Protect Women from Partner Violence

- Conducted 60-minute baseline and follow-up phone interviews, including the informed consent process with women who recently filed for temporary peace or protective orders from their current or former ex-spouse or boyfriend.
- Completed interview summary sheets, adverse event reports, and child abuse mandatory reports.
- Mailed money orders to participants, logged payment information, and maintained call logs of participants.
- Coded open-ended responses as quantitative data through the creation of additional variables.
- Completed data management and data analysis to address research aims.
- Prepared briefings for weekly meetings.
- Trained new interviewers on informed consent process, obtaining contact information, reporting adverse events, safety issues, and data collection procedures through phone interviews with participants.
- Developed presentations for annual conferences.
- Current involvement includes authorship and co-authorship of peer-reviewed manuscripts.

Research Assistant

Baltimore, MD

**Johns Hopkins Bloomberg School of Public Health
Center for Injury Research and Policy**

Summer 2007

Women's Initiative for Safety and Health

- Conducted 60-minute face-to-face baseline and follow-up interviews with HIV-positive women about their experiences with intimate partner violence, HIV, and plans to end the relationship with an abusive partner.
- Completed interview summary sheets, adverse event reports, and child abuse mandatory reports.
- Distributed gift cards to participants, log payment information, and maintain confidential files.
- Participated in weekly meetings and perform additional research-related duties.

Data Abstractor

Baltimore, MD

McKing Consulting Corp. for Centers for Disease Control and Prevention

4/07 – 8/07

Division of Nutrition and Physical Activity**Physical Activity and Health Branch**

- Read published scientific literature on physical activity and related outcomes among different age groups.
- Abstracted relevant standardized data items into a computerized data abstraction form for later synthesis for the development of United States Physical Activity Guidelines.

Research Recruiter

Baltimore, MD

Johns Hopkins Medical Institutions

1/04 – 8/06

Johns Hopkins Sibling and Family Heart Study

- Identified potential research participants by analyzing genetic family trees.
- Contacted potential research participants by telephone to determine eligibility.
- Scheduled baseline and follow-up clinical visits.
- Maintained web-based database used to track phone calls and update contact information.

Asthma Epidemiologist

Oakland, CA

California Department of Health Services

1/03 – 8/04

Environmental Health Investigations Branch

- Collected, cleaned, managed, and edited statewide asthma surveillance data from hospital discharge and mortality records and Behavioral Risk Factor Surveillance System surveys.
- Performed programming and analysis of age-adjusted asthma hospitalization rates and prevalence estimates statewide, by county, gender, and race/ethnicity for all ages and children using SAS.

- Summarized and presented results in quarterly fact sheets using MS Publisher and distributed to members of the California Asthma Partners and 58 county public health departments.
- Prepared technical surveillance reports such as the Asthma Hospitalization Chart Book that documents three year average trends of asthma morbidity by county, race/ethnicity, gender, and age groups.
- Supervised and provided guidance and direction to 3 public health student interns.
- Assisted in writing grant proposals and progress reports for submission to funding agency.
- Developed and administered a data needs assessment questionnaire for statewide distribution.
- Responded to data requests from statewide asthma partners and county health professionals.

Epidemiologist Intern

San Francisco, CA

San Francisco Department of Public Health

10/02 – 1/04

HIV/AIDS Seroepidemiology Unit, AIDS Office

- Completed maps using ArcView GIS describing incidence and prevalence cases of HIV/AIDS among various population groups in San Francisco County.
- Performed data entry of Women's Abortion Clinic Survey using EpiInfo.
- Conducted cleaning and analysis of HIV Testing Survey, 2001 data using SAS and STATA.
- Completed publication documenting the association between receiving an HIV test and knowledge and beliefs of HIV reporting laws.
- Completed research letter documenting the association between HIV prevention burnout and high-risk behaviors among men who have sex with men (MSM), heterosexuals, and injection drug users in San Francisco, CA.
- Conducted data analysis of syphilis dataset from the STD unit examining the effectiveness of traditional partner management in providing intervention among MSM.

MPH Special Project Researcher

Washington, DC

Washington DC Department of Public Health, STD Bureau

1/02 – 8/02

- Conducted literature reviews to complete research proposal investigating the demographic characteristics of people seeking offline sexual encounters via the Internet.
- Submitted appropriate documentation for Institutional Review Board approval.
- Constructed a database using MS Access to store data, collect data, and analyze data using SAS.
- Completed a final report and present results to faculty and students at The George Washington University.

Epidemiologic Interviewer

Oakland, CA

Public Health Institute

5/01 - 8/01

- Conducted confidential telephone interviews of construction workers suffering from occupational ladder fall injuries.
- Recorded responses to interview questions on 20-page questionnaires.
- Updated and maintained logs of all telephone interviews using Microsoft Excel.

Project Assistant

Oakland, CA

Allozyme, Inc.

1/00 - 9/01

- Recruited Jewish Ashkenazi descent psoriasis patients and their families to participate in a research study in efforts to identify the genetic basis of the disease using DNA analysis.
- Updated and maintained Microsoft Access database with required information from questionnaires, consent forms, and medical release forms submitted by participants.
- Organized and scheduled blood sample collections for participants throughout the U.S.
- Completed and submitted annual Institutional Review Board requests for approval of studies.

Research Student Intern

Oakland, CA

Children's Hospital Oakland Research Institute

5/99 - 9/99

- Conducted systematic literature review searches of previous studies researching the association between cord blood preparation procedures and bacterial contamination in umbilical cord blood units.
- Developed an alternative cord preparation procedure for cord blood collection.
- Prepared standard operating procedures for standard and alternative cord preparation procedures.
